

SHARYAR NAVEED

Full-Stack Developer

Islamabad, Pakistan • +92 326 981 9921 • sharyarmalik430@gmail.com • Portfolio • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of professional experience designing and shipping production-grade web and mobile applications. Proficient in React.js, Next.js, Node.js, and modern BaaS platforms including Supabase and Appwrite, with hands-on experience building AI agents, tool-calling workflows, and fine-tuning large language models for domain-specific use cases. Proven ability to own complete project lifecycles from architecture to deployment, with a live Play Store app used by 750+ university students demonstrating real-world impact. Open to relocation and available for on-site, hybrid, or remote opportunities.

EDUCATION

Pak-Austria Fachhochschule Institute of Applied Sciences and Technology

Bachelor of Science in Software Engineering *Oct 2022 – May 2026*

Relevant Coursework: Data Structures, Database Systems, Web Engineering, Software Design & Architecture, Computer Networks, Mobile Application Development, Operating Systems, Information Security

EXPERIENCE

Full-Stack Developer | INOSTRIK *Nov 2024 – Jan 2026 • Islamabad*

- Delivered multiple production-grade web applications for international clients, owning both frontend and backend responsibilities end-to-end.
- Built scalable REST APIs, authentication flows, and responsive UIs using React.js and Next.js, integrated with Supabase and Appwrite.
- Maintained clean, modular codebases following best practices for reusability and long-term maintainability across client projects.

PHP Developer | PROSENSIA *Nov 2023 – Jul 2024 • Remote*

- Engineered an AI-driven predictive maintenance platform for air conditioners, serving as the core product of the startup (prosensia.pk).
- Built a real-time web dashboard enabling remote monitoring and control of IoT devices, integrated with live sensor data streams.
- Collaborated closely with the backend team to design APIs and ensure seamless data flow between hardware devices and the web panel.

Junior Web Developer | ORCA CLAN TECH *Jul 2023 – Oct 2023 • Abbottabad*

- Developed and delivered 4 client-facing web applications: a food delivery platform, an online car showroom (Car Vista), a real-time weather dashboard, and a custom QR code generator.
- Gained hands-on experience translating client requirements into functional, responsive web interfaces using HTML, CSS, and JavaScript.

TECHNICAL SKILLS

Languages: JavaScript, PHP, SQL, C++, Python

Frontend: React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Redis

Mobile: React Native (Expo)

Databases: PostgreSQL, MongoDB, Supabase, Appwrite

AI / ML: LLM Fine-Tuning (Qwen 2.5), AI Agent Development, Tool-Calling Workflows, Prompt Engineering

Tools & DevOps: Git, GitHub, GitHub Actions, Docker, Nginx

PROJECTS

Timetablr → [view](#)

A cross-platform student timetable app with 750+ active university users. Originally built as a Vue.js PWA and later migrated to React Native (Expo) for improved performance and native capabilities. Implemented Redis caching (cache-aside pattern with batched lookups) to optimize backend query performance and reduce database load, and built AI agent / tool-calling workflows to power intelligent in-app features. Delivers automated push notifications 10 minutes before each class, significantly boosting schedule adherence and student engagement.

Tech: React Native (Expo), React.js, PWA, Redis, AI Agents, Push Notifications, Google Play Store, Expo Notifications

Bonny -> [view](#)

Built the complete backend for a location-based restaurant discount platform. Implemented Stripe payment processing for coupon purchases, interactive map integration for nearby restaurant discovery, and server-side QR code generation with single-use validation logic to prevent fraud. Designed RESTful APIs managing restaurants, payments, and real-time redemption workflows.

Tech: Node.js, Express.js, Stripe API, QR Code, Maps API, PostgreSQL

Plyzrx -> [view](#)

Developed the backend and admin panel for Plyzrx, a UNO tournament gaming platform. Built APIs supporting admin-managed tournaments, user participation, match creation, and reward distribution. Also built the marketing landing page.

Tech: Next.js, Node.js, REST APIs, Admin Panel

Advanced Wholesale Order Management System (OMS) - [view](#)

Built and maintained an advanced multi-portal Order Management System (OMS) for Peacock Wholesale, a global K-Beauty wholesale platform. Developed a scalable full-stack system using Next.js, React, TypeScript, and Supabase, featuring vendor management, order assignment workflows, payout and transaction management through Wise and Airwallex, CRM automation, logistics handling, and finance reconciliation. Integrated Intercom for real-time customer support and ticket synchronization. Implemented role-based access control, multi-tenant portals, automated payout routing, inventory workflows, document management, and analytics dashboards to streamline wholesale operations and partner coordination.

Prepy (Final Year Project) — [view](#)

Prepy is an AI-powered exam preparation platform designed for Pakistani FSc and pre-medical students. As a final-year project, I **fine-tuned the Qwen 2.5 3B Instruct large language model** on a custom-curated FSc curriculum dataset to create a domain-specific AI tutor capable of answering subject questions with academic accuracy. The platform features a personalized learning system that analyzes each user's quiz scores and performance patterns to recommend targeted practice and flag weak topics. Additional features include an AI quiz generator, smart document summarizer, study planner, and performance dashboard. The platform is live at prepy.tech and targets students preparing for NMDCAT and ETEA entry tests.
