

SHARYAR NAVEED

Full-Stack Developer

Islamabad, Pakistan • +92 326 981 9921 • [Portfolio](#) • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of professional experience designing and shipping production-grade web and mobile applications. Proficient in React.js, Next.js, Node.js, and modern BaaS platforms including Supabase and Appwrite. Proven ability to own complete project lifecycles from architecture to deployment with a live Play Store app used by 750+ university students as testament to real-world impact.

EDUCATION

Pak-Austria Fachhochschule Institute of Applied Sciences and Technology *Oct 2022 – Present*
Bachelor of Science in Software Engineering

Relevant Coursework: Data Structures, Database Systems, Web Engineering, Software Design & Architecture, Computer Networks, Mobile Application Development, Operating Systems, Information Security

EXPERIENCE

INOSTRIK | **Full-Stack Developer** *Nov 2024 – Jan 2026 • Islamabad*

- Delivered multiple production-grade web applications for international clients, owning both frontend and backend responsibilities end-to-end.
- Built scalable REST APIs, authentication flows, and responsive UIs using React.js and Next.js, integrated with Supabase and Appwrite.
- Maintained clean, modular codebases following best practices for reusability and long-term maintainability across client projects.

PROSENSIA | **Frontend Developer** *Nov 2023 – Jul 2024 • Remote*

- Engineered an AI-driven predictive maintenance platform for air conditioners, serving as the core product of the startup (prosensia.pk).
- Built a real-time web dashboard enabling remote monitoring and control of IoT devices, integrated with live sensor data streams.
- Collaborated closely with the backend team to design APIs and ensure seamless data flow between hardware devices and the web panel.

ORCA CLAN TECH | **Junior Web Developer** *Jul 2023 – Oct 2023 • Abbottabad*

- Developed and delivered 4 client-facing web applications: a food delivery platform, an online car showroom (Car Vista), a real-time weather dashboard, and a custom QR code generator.
- Gained hands-on experience translating client requirements into functional, responsive web interfaces using HTML, CSS, and JavaScript.

TECHNICAL SKILLS

Languages	JavaScript, PHP, SQL
Frontend	React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, REST APIs

Mobile	React Native (Expo)
Databases	PostgreSQL, MongoDB, Supabase, Appwrite
Tools & DevOps	Git, GitHub, GitHub Actions

PROJECTS

Timetabl [→ Google Play Store](#)

A cross-platform student timetable app with 750+ active university users. Originally built as a Vue.js PWA and later migrated to React Native (Expo) for improved performance and native capabilities. Delivers automated push notifications 10 minutes before each class, significantly boosting schedule adherence and student engagement.

Tech: *React Native (Expo), Vue.js, PWA, Push Notifications, Google Play Store*

Bonny

Built the complete backend for a location-based restaurant discount platform. Implemented Stripe payment processing for coupon purchases, interactive map integration for nearby restaurant discovery, and server-side QR code generation with single-use validation logic to prevent fraud. Designed RESTful APIs managing restaurants, payments, and real-time redemption workflows.

Tech: *Node.js, Express.js, Stripe API, QR Code, Maps API, PostgreSQL*

Plyzrx

Developed the backend and admin panel for Plyzrx, a UNO tournament gaming platform. Built APIs supporting admin-managed tournaments, user participation, match creation, and reward distribution. Also built the marketing landing page.

Tech: *Next.js, Node.js, REST APIs, Admin Panel*

Spelling Bee Multiplayer

Real-time multiplayer Spelling Bee application with three difficulty levels. Users can create game rooms, share unique room codes, and compete live. Built with Appwrite for backend and database, and Socket.io for real-time synchronization between players.

Tech: *Appwrite, Socket.io, React.js, Real-time*
