

SHARYAR NAVEED

Full-Stack & AI Developer | Software Engineering Graduate

Islamabad, Pakistan | +92 326 981 9921 | sharyarmalik430@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineering graduate (May 2026) with 2+ years of professional experience delivering production web and mobile applications for international clients and startups. Strong analytical and structured problem-solving skills, applied to AI agents, tool-calling workflows, LLM fine-tuning and data-driven product features. Takes ownership of the full project lifecycle, from architecture to deployment: shipped a live Google Play app with 850+ university users and an AI exam-preparation platform. Experienced working with international stakeholders and finance and payout workflows.

EDUCATION

Pak-Austria Fachhochschule Institute of Applied Sciences and Technology Oct 2022 – May 2026

Bachelor of Science in Software Engineering (graduated May 2026)

Relevant coursework: Data Structures, Database Systems, Web Engineering, Software Design & Architecture, Computer Networks, Mobile Application Development, Operating Systems, Information Security

PROFESSIONAL EXPERIENCE

Full-Stack Developer | INOSTRIK | Remote, Part-Time Nov 2024 – Jan 2026

- Delivered multiple production web applications for international clients, owning frontend and backend end-to-end and working directly with client requirements.
- Built scalable REST APIs, authentication flows and responsive interfaces using React.js, Next.js, Supabase and Appwrite.
- Built and maintained a multi-portal wholesale order management system with vendor management, payout and transaction workflows, and finance reconciliation.
- Maintained clean, modular, reusable codebases to support long-term maintainability across client projects.

PHP Developer | PROSENSIA | Remote Nov 2023 – Jul 2024

- Engineered an AI-driven predictive maintenance platform for air conditioners, the core product of the startup ([prosensia.pk](#)).
- Built a real-time dashboard for remote monitoring and control of IoT devices, integrated with live sensor data streams.
- Collaborated with the backend team to design APIs and ensure reliable data flow between hardware devices and the web panel.

Junior Web Developer | ORCA CLAN TECH | Abbottabad, Pakistan Jul 2023 – Oct 2023

- Delivered 4 client-facing web applications: a food delivery platform, an online car showroom (Car Vista), a real-time weather dashboard and a custom QR code generator.
- Translated client requirements into functional, responsive interfaces using HTML, CSS and JavaScript.

PROJECTS

Timetablr – Cross-Platform Student Timetable App (850+ Users) | [Live App](#) | [GitHub](#)

- Built and launched on Google Play; migrated from a Vue.js PWA to React Native (Expo) for better performance and native features.
- Improved backend performance with Redis caching (cache-aside pattern, batched lookups) and query optimisation; built AI agent and tool-calling workflows for in-app features.
- Delivered automated push notifications 10 minutes before each class, an attendance voting system and a makeup-class recommendation API with conflict detection.

Tech: React Native (Expo), React.js, Next.js, Supabase, Redis, AI Agents, Expo Notifications

Prepzy – AI Exam Preparation Platform (Final Year Project) | [Live](#)

- Fine-tuned Qwen 2.5 3B Instruct on a custom-curated FSc curriculum dataset to create a domain-specific AI tutor for Pakistani pre-medical students preparing for NMDCAT and ETEA.
- Built a personalised learning system that analyses quiz scores and performance patterns to flag weak topics and recommend targeted practice, plus an AI quiz generator, document summariser, study planner and performance dashboard.

Tech: LLM Fine-Tuning, Python, AI Agents, Prompt Engineering, Web Application

Advanced Wholesale Order Management System – Peacock Wholesale (Global K-Beauty Platform) | [Client Site](#)

- Built a multi-tenant, multi-portal system with role-based access control, vendor management, order assignment, inventory workflows, document management and analytics dashboards.
- Implemented payout and transaction management through Wise and Airwallex, finance reconciliation and CRM automation; integrated Intercom for real-time support ticket synchronisation.

Tech: Next.js, React, TypeScript, Supabase

CodeClash Judge – Competitive Programming Judge

- Built a Docker-based code execution and judging system with a queue-driven job pipeline; resolved output-limit handling issues and documented the project.

Tech: Node.js, BullMQ, Redis, Docker

Bonny – Location-Based Restaurant Discount Platform | [Website](#)

- Built the complete backend: Stripe payments for coupon purchases, map-based restaurant discovery and server-side QR code generation with single-use validation to prevent fraud.

Tech: Node.js, Express.js, Stripe API, Maps API, PostgreSQL

Plyzrx – UNO Tournament Gaming Platform | [GitHub](#)

- Developed the backend, admin panel and marketing landing page, with APIs for tournaments, user participation, match creation and reward distribution.

Tech: Next.js, Node.js, REST APIs

ACHIEVEMENTS & CERTIFICATIONS

- **Galactic Problem Solver** – 2025 [NASA International Space Apps Challenge](#) (October 4–5, 2025). Recognised for outstanding participation and efforts to address challenges on Earth and in space, a global hackathon run by NASA with international space agencies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL, C++

Frontend & Mobile: React.js, Next.js, Vue.js, Nuxt.js, React Native (Expo), Tailwind CSS, HTML5, CSS3

Backend & Data: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Supabase, Appwrite, Redis, BullMQ

AI & Analytics: LLM Fine-Tuning (Qwen 2.5), AI Agent Development, Tool-Calling Workflows, Prompt Engineering, Data Pipelines

Tools & DevOps: Git, GitHub, GitHub Actions, Docker, Nginx, Stripe API, Intercom

Professional Skills: Analytical problem solving, project ownership, stakeholder communication, cross-cultural collaboration, fast learning
